

**MEDIA PRESS RELEASE    June 4, 2007**

---

For Immediate release:

**Biological Therapeutics launches new mineral, oxygen and nutritional supplement that promises 100% nutrient cellular absorption for improved health, enhance cellular vitality and slow aging.**

Richmond Hill / Toronto, Canada.

Biological Therapeutics Inc. Canada, announced this week that it has launched its breakthrough mineral, oxygen and nutritional supplement. **Biological Therapeutics Rejuvenate™** is the first in its new line of Cell Therapy products. Rejuvenate with Fulvic Acid is a breakthrough nutritional supplement that has an advanced nutrient and oxygen delivery system derived from the natural benefits of Fulvic Acid. Long believed to enhance cellular vitality and slow aging, Fulvic is one of the most comprehensive answers to the body's need for life-giving nutrients. Its unique formula is designed specifically for 100% optimal mineral absorption, to accelerate cell renewal, and to improve health and energy.

**Biological Therapeutics Rejuvenate™** with Fulvic Acid is possibly the most complete nutrient supplement on the market today" said Dr. K. Dhanani, a Director of the company. "Rejuvenate's effectiveness is second to none, thanks to its active ingredient, Fulvic Acid. Fulvic is one of the most crucial factors in the reversal and prevention of disease as well as the maintenance of good health. Fulvic is a 'miracle molecule' that enables 100% optimal nutrient absorption to the cells. A proven, convenient and powerful 'carrier', one single molecule of Fulvic Acid is capable of carrying 60 or more minerals and trace elements into the cells restoring your body's energy and nutritional balance for better health and vitality.

"We are pleased to launch this new product because it has the potential to help so many people. Some consumers are perhaps confused and certainly concerned about their nutrition and the real lack of minerals and nutrients they are getting from the foods they eat. This will have some serious side effects on the health of many North Americans. We feel that Rejuvenate is the right answer for today and will potentially be of benefit to millions of Canadians and Americans who's health and lifestyles are in retreat from the extremely high levels of toxicity in the body, levels the body was not designed to tolerate. Fossil fuel emissions, oxygen-depleted air, polluted drinking water, chemicals, pesticides, processed foods and stress, all negatively affect our health. We are creating millions of unhealthy people living with degenerative diseases such as arthritis, osteoporosis, hypertension, Alzheimer's, leukemia, heart disease and cancer. "

Biological Therapeutics plans a communications launch across Canada citing the need to alert consumers that 99% of the North American's are deficient in minerals and that over 85% of our farmlands are micronutrient depleted.

These facts, which first published by the US Senate in Document 264 in 1936 and in an Earth Summit Statistics report in 1992, have been kept quietly hidden for decades. "These alarming facts ring true today." adds Dr. Dhanani. "The foods we eat no longer contain enough essential

minerals and are starving us. Over the years, soil erosion, pesticides, insecticides, and herbicides have produced nutritionally empty, tasteless foods that continue to find their way to our tables.

“To compensate, millions of people have been taking traditional vitamin and mineral supplements. But it doesn’t seem to be helping much. With the virtual elimination of Fulvic from our food supply, the situation has created millions of unhealthy people living with degenerative diseases and cancers. The good news is that many people are becoming more aware and are beginning to rethink their supplement choices.”

A superior detoxifier, Rejuvenate boosts energy, reverses cell damage and rejuvenates the natural production of enzymes. An advanced and effective electrolyte and oxygen formula, it supports the immune system, promotes youthful aging, offers immunological support and is a powerful antioxidant and free radical scavenger.

Rejuvenate is great news for undernourished cells. It provides a powerful stream of 136 essential nutrients directly to the cells and includes: 69 electrically charged minerals (analyzed), 21 trace minerals, 28 metabolic enzymes, and 18 amino acids, in a proprietary base of Fulvic Acid and deuterium sulfate.

**Biological Therapeutics Rejuvenate™** is bottled exclusively in MIRON violet-glass bottles to preserve its life-energy.

Dr. Karim Dhanani, Biological Therapeutics’ co-founder said, “I’m hopeful that our new Cell Therapy products such as Rejuvenate, will help millions of people enjoy better health and an active life style through better nutrition and essential mineral support. We’ve had a lot of experience with Rejuvenate. As a company we are dedicated to Biological Medicine, to science and research and to all our products meeting rigorous scrutiny and standards. Rejuvenate will soon have its NPN number issued by Health Canada and will be sold initially at more than 800 national retail outlets and on the web.

#### ***ABOUT BIOLOGICAL THERAPEUTICS INC.***

*Biological Therapeutics is committed to providing the highest quality and most scientifically advanced health and wellness products. Their products support the body's natural ability to heal, helping to achieve a level of health and well being most people would never have thought possible. The company's mission is to introduce exceptional products that truly make a difference. As such, their products are developed and manufactured to the highest standards of purity, quality and efficacy for those who demand and need the very best, at the best possible price.*

*The founders of Biological Therapeutics have long and extensive backgrounds in the areas of Naturopathic Medicine and Biological Medicine. They hold the view that both wellness and recovery begin at the cellular level and that illness, as a series of events, can be changed or redirected toward order and balance. The company's goal is to educate and empower the individual with viable health and healing alternatives and provide a reliable resource base that can be used to treat ailments at their root source.*
